

TIM Partner Portal

Efficient management of your projects

The TIM Partner Portal provides you with digital tools and resources to make your joint business activities even more efficient: Central management creates maximum transparency.

Order module | An overview of your orders

Digital order tracking creates transparency in order management. With the centralised view of all the relevant dates and order-related documents you can keep an eye on everything.

- Display of your orders / delivery dates (individual assignments of permissions possible)
- Status notifications when delivery dates are changed (for all orders or individually order-specific)
- Central filing of order confirmation, delivery note, invoice, proof of delivery, licence and support documentation, proof of performance, etc.
- Overview of the serial numbers within your order
- Simple assignment of your delivery using a search by the manufacturer order number
- Shipment tracking by tracking link

Ordertracking

Keep an eye on your orders:

With digital order tracking, you can quickly and easily check the delivery status of your orders at any time. See at a glance whether your order(s) are still being processed or have already been delivered.

Project module | Registration and management

Whether current project status or expiring registration – manage your projects centrally and simplify your business.

Registration:

- Easy online project registration:
without logon possible | Deal Reg in just 4 steps | manufacturer independent process
- Overview of manufacturer-specific requirements
- Comparison for central Deal Reg teams using CSV export

Management:

- Overview of all TIM registered projects (individual assignments of permissions possible)
Only „own“ | manufacturer related | location-related (group) or all
- Overview of expiring project registrations
- Proactive updating of project statuses possible

Project management

Efficient management of your projects:

The central administration creates maximum transparency for all projects registered with TIM in your company.
Whether it is expiring registrations or the current project status - you have an overview and can also register new projects directly.
