

A nighttime cityscape with a network overlay of blue lines and dots. The city lights are visible in the background, and the network lines are overlaid on the scene. A large red shape is on the right side of the image.

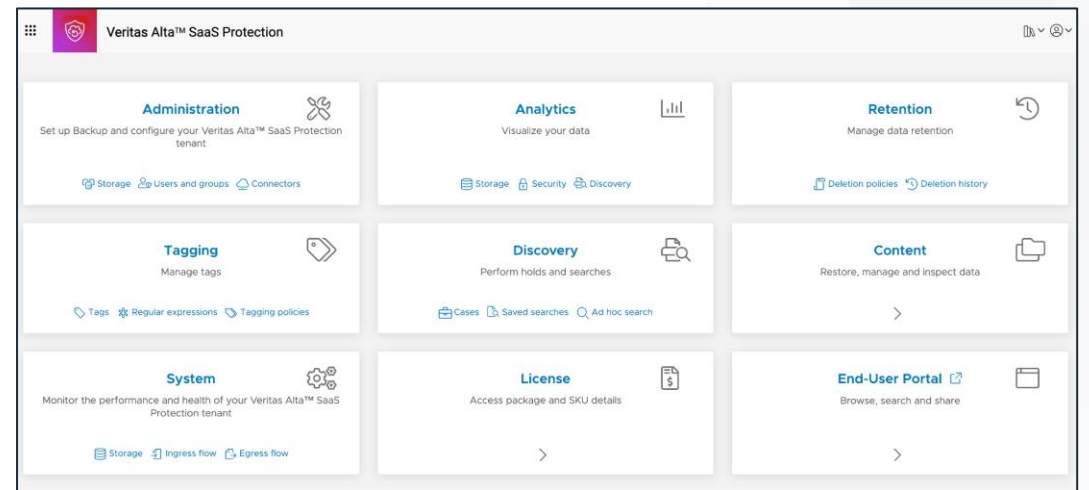

VERITAS™

Demoboost for Partners

Steps to guide your partners

What is Demoboost?

- Demoboost is a 3rd party product used by Veritas to build click-thru demos.
- The software screen scrapes the Veritas product and allows us to build step-by-step use case demos.
- What are the benefits of Demoboost?
 - No “live demo” stress with complicated labs.
 - No lab or cloud costs involved.
 - Full talk track provided for every demo.
 - All you need is internet access!

Demoboost: How do I get access?

Step 1

Access via PartnerNet -> Training -> Learncentral.

Step 2

Search LearnCentral for "Demoboost" to get a full listing.

Step 3

Download the supporting script/talk track, open in PowerPoint.

Step 4

Launch the demo.

Step 5

Click on purple hot spots or use the arrows at bottom right of screen to advance
